

Customer Advisory

Date: 29th August 2024

Dear Valued Customers

Subject: GLX & CMX Revamp; SMX Service Launch

We are pleased to announce the revamp of our existing Galaxy (GLX) and Cosmos (CMX) services, as well as the launch of our new Sirius (SMX) service. Collectively, all three services enhance overall Far East-Middle East connectivity, providing the widest and most in-depth coverage in the market.

The Sirius service, named after the brightest star in the night sky, lights the way to further connectivity between the Far East and Middle East, with a focus on serving key South Chinese ports, viz. Nansha and Da Chan Bay.

At the same time, we have further made modifications to the GLX and CMX service rotations by reshuffling port calls to continue creating network solutions optimised to evolving market demands. The strategic alignment of routes has reduced transit times and increased service frequency between regions, as well as enhanced overall network connectivity. Hamad and Bahrain are the newest additions to our Far East-Middle East specialised services.

GLX service rotation: Busan – Qingdao – Xiamen – Da Chan Bay – Port Klang – Jebel Ali – Dammam – Bahrain – Busan

CMX service rotation: Shanghai – Ningbo – Shekou – Singapore – Jebel Ali – Khor Fakkan – Sohar – Port Klang – Shanghai

SMX service rotation: Nansha – Da Chan Bay – Port Klang – Jebel Ali – Hamad – Nansha

The revamped GLX and CMX services will commence on 29th October from Busan and Shanghai respectively, while the SMX maiden voyage will begin on 8th November.

Please refer to the attached brochures for more information about the revamped GLX and CMX

services, as well as the new SMX service. Should you require further information, please visit our website (<https://www.emiratesline.com>) or contact your local customer service representative.

Global Customer Service
Emirates Shipping Line

Vessels Deployed: 7 x 7,000 nominal TEU ships

FEATURES

- ESL's flagship service now offers a streamlined route, directly linking major Korean and Chinese ports to key destinations in the Middle East with enhanced transit times.
- The inclusion of Dammmam in the rotation significantly boosts connectivity to the growing market in the Kingdom of Saudi Arabia.
- Unique direct call to Bahrain, catering to specific market demands.
- Supported by a comprehensive feeder network which facilitates seamless connections to multiple destinations in the Middle East.
- Along with the CMX, SMX and CGX services, provides the most extensive coverage across the Far East and Middle East regions.
